

Trona High School Technology Recognition Plan

ISTE COACH STANDARD 4.1d

A future-facing system for recognizing educators who use technology to strengthen grades 7–12 learning

UPCOMING ROLE CONTEXT

Listening first at Trona High School

As I prepare to serve as the sole grades 7–12 social science teacher at Trona High School, I will enter the organization as both a new colleague and an emerging technology coach. This plan helps me learn what is already working, recognize colleagues with their permission, and avoid making assumptions before I have observed their practice.

STARTING CONNECTION Meet with school leaders and the district's Director of MOT & Technology to understand existing tools, supports, and educator-led practices.

FIRST 60 DAYS

Observe → Invite → Celebrate

Observe lessons and listen to colleagues. Invite voluntary examples or nominations. Publish brief spotlights only after the educator reviews and approves the wording.

WHAT I WILL RECOGNIZE

High-impact technology practice

- 1 Learning**
Technology deepens inquiry, feedback, collaboration, or student agency.
- 2 Access**
Materials are accessible and learners have multiple ways to participate.
- 3 Leadership**
The educator models practice, shares resources, or supports colleagues.

SPOTLIGHT RECORD TO COMPLETE AFTER ONBOARDING

Educator + role	Practice observed
Evidence of impact	Idea others can adapt

Add the completed, educator-approved records to the portfolio as school-based evidence.
