

Trona High School Technology Recognition Plan

A future-facing system for recognizing educators who use technology to strengthen grades 7-12 learning

UPCOMING ROLE CONTEXT

Listening First at Trona High School

Before I begin as Trona High School's sole grades 7-12 social science teacher, I will enter as both a new colleague and an emerging technology coach. This plan helps me learn what already works, recognize colleagues with permission, and avoid assumptions before I have observed their practice.

STARTING CONNECTION

Meet with school leaders and the district's Director of MOT & Technology to understand existing tools, supports, and educator-led practices.

WHAT I WILL RECOGNIZE

High-Impact Technology Practice

1

Learning

Deepens inquiry, feedback, collaboration, or student agency.

2

Access

Makes materials accessible and offers multiple ways to participate.

3

Leadership

Models useful practice, shares resources, or supports colleagues.

FIRST 60 DAYS

Observe > Invite > Celebrate

Observe lessons and listen to colleagues. Invite voluntary examples or nominations. Publish brief spotlights only after each educator reviews and approves the wording.

SPOTLIGHT RECORD TO COMPLETE AFTER ONBOARDING

Educator + role

Practice observed

Evidence of impact

Idea others can adapt

Add completed, educator-approved records to the portfolio as school-based evidence.
